Visiting the Museum

Journey to Space

3rd Floor

Learn the great wonder of Space and the uniqueness of Planet Earth from the mysterious features of nebulae and star clusters, the characteristics of solar system bodies, and the origin of meteorites.

Planetarium

Enjoy a trip to space and the starry sky made up of 100 million stars and powerful full-dome video.

The optical planetarium projector

Guidance for planetarium show.

Content varies with each show. Please check our website for the timetable of shows. (each show lasts about 45 minutes)

Purchase planetarium tickets of your desired time at the ticket office on the first floor

Viewers are requested not to enter or leave the planetarium once the show has started. Exceptions will be made for those who need to leave due to illness or the like.

Toyama: A Journey Through Space

2nd Floor

Join us as we travel from the mountains of Tateyama to the deep waters of Toyama Bay, along the way exploring a variety of natural environments and discovering the plants and animals living there and related scientific principles and laws. We will also reflect on the relationship between human beings and the natural world.

Main Exhibits

- 1 Rock Ptarmigan
- 2 Diamond dust
- 3 Natural cedar stump
- 4 Water beads coaster
- 5 Toyama Bay whale (giant beaked whale)

2 Diamond dust

1 Rock Ptarmigan
